Abstract (en)

[origin: WO2019076528A1] The invention relates to a control device (16) for the autonomous operation of a light motor vehicle (10) having a receptacle (44) for goods, which control device is designed to control a traveling motion of a light motor vehicle (10) in such a way that the light motor vehicle (10) travels autonomously from a starting point within an area to a destination region and which control device is designed to control an unloading device (11; 14) in such a way that goods located in the receptacle (44) of the light motor vehicle (10) are autonomously unloaded onto a loading surface (13) by the unloading device (11; 14).
