Abstract (en)

There is provided a sheet dispenser comprising a housing (5, 6) and a mount (40, 41) for mounting a roll of sheet material inside the housing. The mount comprises a base portion (40) having a central pin and a circular ridge extending around a circumference of the central pin, wherein the central pin and circular ridge define a circular channel between them, wherein the central pin, circular channel, and circular ridge are for connecting to an end portion (20) of a roll of sheet material (10) when the roll of sheet material is installed into the sheet dispenser, wherein the central pin is for inserting into a central aperture of the end portion, the circular channel is for receiving a circular rib of the end portion, and the circular ridge is for inserting into a circular groove of the end portion.
