Abstract (en)

[origin: CN111588304A] A broom-type vacuum cleaner (2) comprises: a handle (4), a suction head (5) configured to contact the ground to be cleaned, and a main body (3) arranged between the handle (4) and the suction head (5), and a waste separation and storage device (7) removably installed on the main body (3). The main body (3) includes a first half shell (3.1) and a second half shell (3.2), the first half shell (3.1) and the second half shell (3.2) are assembled with each other, and the first half-shell (3.1) and the second half-shell (3.2) define an internal connection duct (11), the internal connection duct (11) is configured to fluidly connect the suction head (5) to the air inlet (12) of the waste separation and storage device (7).
