Abstract (en)
The present invention relates to a tool fixing system for tool carts which allows quickly, easily and comfortably coupling and fixing different accessory elements (A) to the top tray (2) of a cart (1), thereby increasing its versatility, the fixing system (10) comprising: a support part (20) located below the top tray (2) in correspondence with a housing (3) made in said top tray (2), where the support part (20) has a vertical bolt (21) that can be inserted into the housing (3) without projecting from the horizontal plane of the top tray (2); a hollow tube (30) that can be inserted into the housing (3) of the top tray (2), such that the lower end of the tube (30) can in turn be fitted to the vertical bolt (21) of the support part (20) for attachment thereof; and a main flange (40) fixed to the tube (30) and to which an external accessory element (A) can be coupled.
