Abstract (en)
This invention relates to a pre-assembled water based liquid supply system (10) comprising a water supply point, at least two of the following components: a liquid filtering component or a liquid sterilizing component or a carbonation component or a boiler component or a safety group or a cooler component or an enrichment component, at least two of the following tanks: a cold liquid tank or a hot liquid tank or a carbonized liquid, a control unit, an electric power supply line, and a liquid dispensing point, characterized in that said water based liquid supply system (10) further comprises a liquid-tight closed housing (18), said housing (18) being adapted and configured to be accommodated in an under-sink kitchen cabinet (12), said water supply point being designed as a water supply connector adapted and configured to be connected to a water supply pipe leading to said water mains, and said liquid dispensing point being designed as a liquid dispensing connector adapted and configured to be connected to a pipe leading to a counter-top faucet (16) mounted to a counter-top of the under-sink kitchen cabinet (12).
