Abstract (en)
[origin: WO2019081717A1] The invention relates to a device (1) for preparing a fermented beverage, in particular an alcohol-free beverage, including: - a fermentation tank (20), intended for receiving the ingredients of the beverage to be prepared; - collection means (23) for collecting from the fermentation tank the beverage that is being prepared or ready for consumption in order to transfer it into one or more containers; and - an ageing chamber (30), intended for receiving the beverage being prepared, the beverage being prepared in particular being capable of being contained in the one or more containers or directly in the ageing chamber, the device being configured to allow (i) control of the temperature inside the fermentation tank at a first temperature level and (ii) control of the temperature inside the ageing chamber at a second temperature level, the first and second temperature levels possibly being different.
