Abstract (en)  
[origin: WO2020142004A1] The disclosure relates to a tobacco unit of a heatable tobacco product for use with a heating device, which comprises a tobacco material, and a heat-transmitting material, integrally attached to the tobacco material, plastic net filter wherein the heat-transmitting material is adapted to form a plurality of heat transmitting paths for distributing heat from the heating device across the tobacco unit such that the tobacco material of the tobacco unit is homogenously heated. The disclosure also relates to a heatable tobacco product comprising the tobacco unit and a heating device for use with the heatable tobacco product.
