Abstract (en)
[origin: WO2019081275A1] The invention relates to a clamping device (10) for axially (AR) clamping a tool disk (300) to a flange (30) associated with a drive spindle (20) of a hand-held power tool (100), the clamping device (100) having a screw (2), which is to be screwed into an internal screw thread (22) of the drive spindle (20) in order to fixedly clamp the tool disk (300), the screw (2) being mounted in a coupling module (1) of the clamping device (10), the coupling module (1) having an inner contour (16) that is or can be paired with the drive spindle (20) interlockingly in the peripheral direction (U) for conjoint rotation.
