Abstract (en)

[origin: WO2019081156A1] The invention relates to a device for non-motorized inspection (10) of a fluid pipe (11), comprising a monitoring device (12) for generating at least one representation (13) of said pipe, an inertial unit (14) for determining orientation data (15) relating to the inspection device, and a means (18) for preventing deformation of the at least one representation (13).
