Abstract (en)
[origin: WO2020078510A1] The invention relates to a viewing window for insertion into a viewing opening (2), in particular a viewing opening (2) in a ventilation and air-conditioning system and/or a climate chamber, said viewing window comprising two pane supports (3, 4) which can be connected to one another by a rotary joint (30) that is prevented, by means of a notched locking mechanism (31), from accidentally coming loose.
