Abstract (en)

[origin: WO2019081131A1] The invention relates to a fastening unit for fastening a light (30) to a supporting element (4), comprising a first element (1) which is designed to be connected to the light (30) and a second element (2) which is designed to be connected to the supporting element (4), the first element (1) being mounted such that it can pivot back and forth about an axis (A1) in relation to the second element (2), between a first pivoting position and a second pivoting position, a catch device (3) being designed to hold the first element (1) in the first pivoting position.
