Abstract (en)

[origin: WO2019081271A1] The invention relates to a combination appliance that comprises a cooktop (10) with at least one cooking module (101), at least one fume extraction device (11) comprising at least one fan (110) with at least one suction opening (1101), and at least one air inlet opening (111) for the fume extraction device (11). The air inlet opening (111) is arranged in a recess (1000) of the cooktop (10), and the at least one fan (110) is located underneath the at least one cooking module (101) of the cooktop (10). The invention is characterized in that the combination appliance (1) has at least one grease filter (1201) and at least one odor filter (1210) which are arranged between the air inlet opening (111) and the at least one fan (110).
