Abstract (en)

[origin: WO2019081273A1] The invention relates to a combined device that comprises a cooker hob (10) with at least one cooker module (101), a fume extraction device (11), which is arranged at least partly below the at least one cooker module (101) and has at least one fan (110) with at least one suction opening (1101), and at least one air inlet opening (111) for the fume extraction device (11), said air inlet opening being arranged in the cooker hob (10). The combined device (1) is characterized in that the combined device (1) has at least one support (103, 104) with the elements of the power electronics of at least one cooker module (101) of the cooker hob (10), and the at least one support (103, 104) is arranged in the combined device (1) at an angle to the at least one cooker module (101).
