Abstract (en)

[origin: WO2019081993A1] One subject of the invention is a masking material which is intended to be dispersed by ammunition or a launcher in order to produce a cloud that ensures the masking of a target with respect to electromagnetic radiation in a given range of wavelengths. This material is characterized in that it comprises at least one aluminium oxyhydroxide, such as boehmite or pseudo-boehmite. Another subject of the invention is ammunition for dispersing such a masking material and the use of aluminium oxyhydroxide, such as boehmite or pseudo-boehmite, as masking material that can be dispersed by ammunition.
