Abstract (en)
The present invention relates to an amusement and leisure slide for attraction parks, hotels, business or shopping centers with various combinations of thrilling experiences. It is proposed An amusement attraction comprising a sliding section configured to receive a sliding element, the sliding section being further connected to actuator means adapted to modify and/or move and/or rotate and/or tilt the sliding section in order to influence the position, speed or path of the at least one sliding element within the sliding section. The movement of the sliding section transfers energy to the sliding element allowing the sliding element to freely move into the sliding section.
