Abstract (en)
The invention relates to a destination call arrangement (1) for an elevator (2) comprises a main part (3) and an auxiliary part (4). The main part (3) comprises multiple destination floor call buttons (3a, 3b, 3c) for selecting a destination floor, while the auxiliary part (4) consists of one or more destination switches (4a, 4b, 4c). The one or more destination switches (4a, 4b, 4c) of the auxiliary part (4) are configurable to function as the at least one destination floor call button (3a, 3b, 3c). The one or more destination switches (4a, 4b, 4c) are placed lower than at least one of the multiple destination floor call buttons (3a, 3b, 3c), when the destination call arrangement (1) is installed for the elevator (2).
