Abstract (en)

[origin: EP3702717A1] Described is a head (3) for thermal radiators, formed by a hollow body (11) which has an end cap (12) and a side wall (13), which extends from the end cap (12) and finishes with at least two tubular extensions (14) facing the end cap (12); wherein the side wall (13) is equipped with two circular openings (15) axially aligned with each other along a direction at right angles to the direction of extension of the tubular extensions (14); and wherein the circular openings (15) are made and lie on respective flat lateral faces (16), parallel to and facing each other, of the hollow body (11), and the peripheral edges (17) of the circular openings (15) are each shaped like a single thread (18) made in the thickness of the respective flat lateral face (16).
