Abstract (en)

[origin: WO2018224655A1] The invention relates to methods and devices for determining a near-vision point. A person under examination looks at a movable near-vision target (60), and an image of the person is captured using a camera device (62). The orientation and/or position of the near-vision target (60) is also determined. The near-vision point is then determined therefrom.

Abstract (de)

Es werden Verfahren und Vorrichtungen zur Bestimmung eines Nahdurchblickpunktes bereitgestellt. Dabei blickt eine zu untersuchende Person auf ein bewegliches Nahblickziel (60), und ein Bild der Person wird mit einer Kameraeinrichtung (62) aufgenommen. Zudem wird Orientierung und/oder Position des Nahblickziels (60) bestimmt. Hieraus wird dann der Nah-Durchblickpunkt bestimmt.
