Abstract (en)
[origin: WO2019086192A1] The invention relates to a continuous casting line, which has a mold (1) for the output of a strand (S) and a strand guide (2) connecting to the mold (1) having a plurality of rollers (24) arranged in pairs for transporting the strand (S) in a conveying direction (F), wherein one or more of the rollers (24) can be engaged such that a thickness reduction of the strand (S) occurs in the strand guide.
