Abstract (en)  
[origin: WO2019086096A1] The invention describes an electronic processing apparatus (10) for determining railroad information, comprising a sensor adapted to provide a sensor signal representing a railroad property or a railroad event, a gateway adapted to communicate with the sensor and with a remote processing unit, and a mounting base (12) adapted to be fixedly mounted to a crosstie (14) of the railroad, wherein the mounting base (12) carries at least one electronic device (8) of the electronic processing apparatus (10).
