Abstract (en)
[origin: WO2019086203A1] The invention relates to an escalator (1) which comprises a structural frame (6), said escalator (1) being connectible to a lift (30). For this purpose, fastening points (20) for fastening components of the lift (30) are arranged on the structural frame (6) so that at least some of the components of the lift (30) can be supported by means of the structural frame (6).
