Abstract (en)

[origin: WO2019086266A1] The invention relates to a fuse for a motor vehicle electrical circuit. The fuse comprises at least one single-piece connection end (5) provided with a tongue (9), said tongue (9) being formed by crushing a crimping portion, for example consisting of an, optionally hollow, cylinder. The invention also relates to a method for producing the fuse and to a method for mounting same.
