Abstract (en)

[origin: EP3705790A1] Disclosed is a locking device (1) for a radiator bracket and a radiator bracket (20, 120) comprising such locking device (1). The radiator bracket (20, 120) comprises support means (24) for supporting a radiator (30) or stirrup member (31) disposed thereon, and the locking device (1) prevents unintentional dismounting of the radiator (30) from the bracket (20, 120) in a locking position by means of a locking lug (6, 14). The locking device (1) is pivotally disposed on the bracket (20, 120) by means of a pivot pin (4) and is pivotable between an open position and locking positions. A spring means (5) enables automatic snap fastening and a holder arm (7) and a pin protrusion (10) enables a safe but still pivotable attachment of the locking device (1) to the bracket (20, 120).
