Abstract (en)
[origin: WO2019092494A1] A skin cosmetic makeup set is provided. The skin cosmetic makeup set comprises: a first composition to be applied to the skin so as to form at least one "first" layer, and a second composition to be applied over all or a part of said first layer; said first composition comprising an aqueous solvent, at least one black pigment, and at least one film-forming agent, the at least one film-forming agent representing in the range 10% to 45% by weight of the total of said first composition; and said second composition comprising at least one interference pigment, the interference pigment comprising a transparent substrate coated with at least one layer of coating material, said coating material being TiO₂.
