Abstract (en)

[origin: WO2019092354A1] A device (10) for manufacturing a metal alloy blank by centrifugal casting of a molten metal alloy, comprising a centrifugal casting wheel (20), the centrifugal casting wheel (20) being able to rotate about an axis of rotation (A) and comprising a mould (22) for receiving the molten metal alloy, the mould extending in a radial direction (R1) relative to the axis of rotation (A). The device (10) comprises at least one magnet arranged in such a way as to induce an induced electrical current in the mould (22) when the centrifugal casting wheel (20) rotates about the axis of rotation (A).
