Abstract (en)

[origin: EP3483206A1] There is provided a polyethylene-based film useful in the production of silage, said film comprising polyethylene a content of 60-90 % by weight of the film, wherein the polyethylene is selected from linear low density polyethylene (LLDPE) and low density polyethylene (LDPE) and combinations thereof, and a dicyclopentadiene hydrocarbon resin at a content of 3-20 % by weight of the film. The film has good oxygen barrier properties and is useful in production of silage.
