Abstract (en)

[origin: WO2019086088A1] An object of the invention is achieved by a mounting element (10) for mounting a unit on a wall face. The mounting element comprises a mounting end (12) and an insertion end (14), which ends define an insertion direction (60). The mounting element further comprises a flange (30) positioned between the ends, which flange, in one embodiment, comprises a plurality of legs (32) extending in a flange plane (62) perpendicular to the insertion direction to an outer periphery (38). In another embodiment, the flange comprises a plurality of holes (34) adapted for engaging with a thread of a screw. The mounting element further comprises a thread (20) between the flange and the insertion end.
