Abstract (en)
[origin: WO2019086820A1] The invention relates to a device for applying an electrical pulse, including at least one glove (1) comprising a glove body (2) ending in glove fingers (3), at least three of which are provided with first application contacts (5), connected to an electrical energy source (4) via a control unit (4B), characterised in that the glove (1) further comprises second application contacts (5A) and in that the control unit (4B) comprises selection means (15) for applying a differential electrical pulse between the first (5) and second application contacts (5A).
