Abstract (en)

[origin: WO2019086089A1] A socket element (10) for installation of an electrical socket in a wall insulation (54) comprising along an insertion direction (40) a mounting aperture (12) connected to a flange (30), which is connected to an insertion end (14). The flange comprises a centrally-positioned flange aperture (32) and a flange face (34) defining a flange plane (42), which is perpendicular to the insertion direction (40). The flange face may have a plurality of structure gaps (36). Use and a method of mounting said socket element in a wall are also disclosed.
