Abstract (en)
There is provided an egg package transfer apparatus (1) that transfers a plurality of egg packages (P) collected in a temporary waiting region (21) to an accommodation space (A), the egg package transfer apparatus (1) including: a gripping unit (11); and a control unit (3). The control unit (3) controls an operation for gripping the plurality of egg packages (P), releasing a state of gripping one egg package (P) of the plurality of egg packages (P) at a first position inside a case (C), which is the accommodation space (A), and then, moving the gripping unit (11) and releasing a state of gripping the other egg package (P) of the plurality of egg packages (P) at a second position different from the first position inside the case (C).
