Abstract (en)

[origin: WO2019096804A1] An attachment device (100) for attaching a panel (2) of a drawer (1) to a drawer wall (4a, 4b), wherein the attachment device (100) has a holding element (101) that can be arranged on the panel side, and a catch device that can be arranged on the drawer wall side and has a catch element (116) that is pivotally mounted on a base element, wherein the catch element has an axis of rotation and a force accumulator can apply force to the catch element, said catch element being moveable back and forth between a release position and a catch position, wherein the catch element (116) is designed, in the catch position, to hold the holding element (101) on the drawer wall. The device is characterised in that the catch element is locked in the catch position by means of a local displacement of the axis of rotation of the catch element (116).
