Abstract (en)
[origin: WO2019097144A1] The invention relates to a device for the bundle-packaging of products (1) into first and second batches (2), said device comprising: cutting means (5) divided into a first knife (50) for cutting a first film (6) into a first sheet (60) for covering the first batch (2) and a second knife (51) for independently cutting a second film (10) into a second sheet (100) for covering the second batch (2); and supply means (9) supplying the cutting means (5) with the first film (6) from a first reel (61) and the second film (10) from at least one second reel (101), said supply means comprising at least one first drive roller and at least one second drive roller having separate actuation means.
