Abstract (en)
[origin: WO2019097371A1] This invention relates to a package for containing and picking up stacked articles (A) and a method for making the package, which make it possible to reduce the production costs of the package and, in any case, obtain a package which is sufficiently rigid to keep the shape of the above-mentioned package. The package comprises a stiffening structure (11) and a piece of plastic film (12) enclosing the stack and the stiffening structure. An opening is formable in the upper wall of the package to access the articles in the stack.
