Abstract (en)
[origin: WO2019096342A1] The invention relates, inter alia, to a construction block (10) comprising two outer shells (14, 15) and a central shell (16) provided therebetween. The outer shells and the central shell consist of foamed concrete, the outer shells each have a higher bulk density and the central shell has a lower bulk density relative thereto, and the central shell is permanently connected to the two outer shells.
