Abstract (en)

[origin: WO2019092260A1] The invention relates to a spring cup (2) intended to be fitted on a strut of a damper device, said cup (2) comprising a main body (20). According to the invention, the cup (2) comprises a deformable shock-absorber structure (3) made up of a barrier (31) disposed around and at a distance from a peripheral edge (21) of the main body (20), and reinforcing elements (32) connecting said barrier (31) to the main body (20), said reinforcing elements (32) being spaced apart from one another and distributed circumferentially around the peripheral edge (21) of the main body (20).
