Abstract (en)

[origin: WO2019096488A1] The present invention relates to a cooker device (1) comprising an upper plate on which electric heaters and/or gas burners are disposed, at least one skirt (3) shaped by bending the edge portions of the upper plate (2), surrounding the upper plate (2) at least partially, a lower housing (4) on which the upper plate (2) is assembled, and at least one connecting spring (5) enabling the upper plate (2) to be detachably assembled to the lower housing (4), having a seat (6) resting on the lower housing (4), and a resilient main extension (7) extending upwards and in an inclined manner from the seat (6), whose portion between the skirt (3) and the lower housing (4) is shaped by being bent in a V-shape, wherein at least one retainer (8) is provided on the base of the lower housing (4), enabling the connecting spring (5) to be fixed to the lower housing (4) by way of snap-fit method, and wherein at least one detent (9) is provided on the connecting spring (5), extending outwards from the seat (6) and enabling locking by engaging the retainer (8).
