Abstract (en)

[origin: WO2019096701A1] The present invention relates to a range hood device for a cooktop, which range hood device has at least one evacuation opening (30) in the upper side, a fan (32) which is offset toward the bottom relative to the evacuation opening (30) and a connecting channel (34) between the evacuation opening (30) and the fan (32). The range hood device (3) is characterized in that at least one odor filter (33) is provided upstream of the at least one air inlet opening (321) of the fan (30) in the direction of flow. In addition, the invention relates to kitchen furniture having at least one cooktop. The kitchen furniture (1) is characterized in that at least one such range hood device (3) is integrated into the kitchen furniture (1).
