Abstract (en)

[origin: WO2019096838A1] The invention relates to a method for creating a traffic information collection, in which steps are carried out, including: detecting a current position of a motor vehicle; detecting a current time at which the position is detected; transmitting the position and the time to an off-board collection unit; and determining a future speed curve of the motor vehicle by the motor vehicle. Steps are also carried out, including: transmitting the future speed curve to the collection unit; and creating the traffic information collection based on the position, the time and the future speed curve.
