Abstract (en)
The present disclosure relates to the field of smoking tobacco. In particular, the present disclosure relates to smoking substitute systems and particularly, although not exclusively, to a heat-not-burn (HNB) smoking substitute system. Further in particular, the present disclosure relates to a smoking substitute system having a shroud. Accordingly, there is provided a smoking substitute device (10), comprising a main body (16), a cavity (14) and a heating element (12), wherein the cavity (14) is arranged in the main body (16), wherein the heating element (12) is arranged in the interior of the cavity (14), wherein the smoking substitute device (10) is adapted for receiving a smoking substitute consumable (20), wherein the heating element (12) is adapted for heating the smoking substitute consumable (20), and wherein the smoking substitute device (10) comprises a shroud (38) at least partially surrounding the cavity (14).
