Abstract (en)

A smoking substitute system (100) and device including a heater. The heater includes a heating element (223) including a resistive heating track formed thereon. The heater further includes a mount (233) surrounding a portion of the heating element and the heating track. The heating element is formed from a heater material of a first thermal conductivity and the mount is formed from a mount material of a second thermal conductivity. The second thermal conductivity is lower than the first thermal conductivity.
