Abstract (en)
A smoking substitute device (101, 201) is described. The smoking substitute device comprises a rechargeable power supply (105, 205); a controller (108, 208); and a plurality of feedback lights (211). The controller is configured to: during charging of the rechargeable power supply: statically illuminate at least one of the plurality of feedback lights, wherein the number of statically illuminated lights of the plurality of feedback lights is based on a present charge level of the power supply, and illuminate at least one of the plurality of feedback lights with a flashing pattern to indicate that charging is taking place.
