Abstract (en)
A heat not burn device including a heater (204) for penetrating a portion of a heat not burn consumable (202) engaged with the device is disclosed. The heater includes an electrically conductive heating track (250). Further, the heater includes an electrically conductive temperature sensing track (260) such that the temperature sensing track has a serpentine section (261) extending along a major axis of the heater. The heater comprising a temperature sensing track may facilitate accurate measurement of temperature during heating of an HNB consumable.
