Abstract (en)  
The invention relates to a furniture glide for a lying base of a piece of furniture which can support on a ground surface, wherein the furniture glide comprises:- a mounting body which defines a first receiving space for receiving a part of the lying base and is configured to clamp fixedly onto the part of the lying base when the part of the lying base is received in the first receiving space; and- a glider body, wherein the mounting body and the glider body are provided with mutually co-acting connecting means for connecting the glider body to the mounting body. The invention also relates to a piece of furniture with a lying base which can support on a ground surface, wherein the lying base is provided with at least one such furniture glide. The invention further relates to a method for arranging such a furniture glide on a lying base of a piece of furniture which can support on a ground surface.
