Abstract (en)

[origin: EP3713248A1] A device (1) has a power adaptor (10) and speaker devices (50). The power adaptor (10) is for receiving input electrical power and outputting electric power for charging a rechargeable battery or powering another device. The speaker devices (50) are for outputting audio. Each speaker device (50) has an electrical power pin (52) for connection to a respective socket of a mains power socket. Each speaker device (50) has an electrical connection (54) to the power adaptor (10) so that the electrical power pins (52) of the speaker devices (50) can receive input electrical power from a mains socket to which the electrical power pins (52) are connected in use and pass the input electrical power to the power adaptor (10) via the electrical connections (54).
