Abstract (en)
[origin: EP3713378A1] The invention relates to an emergency device for lighting means (1), having a driver stage (5) and terminals (3, 3') to drive emergency lighting means (2) based on a DC power supply (4, 4'). The emergency device for lighting means (1) comprises a wireless communication unit, wherein the wireless communication unit is designed to receive a first signal from a neighboring emergency device for lighting means (13) and to transmit a second signal to the neighboring emergency device for lighting means (13).
