Abstract (en)
[origin: WO2019101574A1] The invention relates to a device for fixing a drawer-type element (1) on a rail (8) of a pull-out guide (6), which device comprises a clamping mechanism (10), which has a housing (12) with a receptacle (15) into which an elongate holding part (11) can be inserted to fix same on the housing (12), wherein in the receptacle (15) at least one moveable clamping body (20) is provided, which rests on one side against the holding part (11) and on the opposite side against a supporting wall (18) that is oriented obliquely to the insertion direction of the holding part (11). This enables high holding forces to be provided at the clamping mechanism (10).
