Abstract (en)
[origin: WO2019101379A1] The invention relates to cosmetic compositions for cosmetic treatment of keratin fibres, containing, in each case based on weight: (a) fibres, (b) ethanol, (c) at least one polymer, (d) propellant, (e) 0 to 10 wt% dye(s), (f) 0 to 10 wt% pigment(s) with the proviso that the sum of the quantities of constituents (e) and (f) is 0.0001 to 10 wt%. Said cosmetic compositions increase the hair volume and produce an increase in the fullness and the feeling of "having more hair". Due to the colouring of the product, it is simultaneously possible to cover bald areas, without any rubbing off on the hands or clothing or pillow.
