Abstract (en)
[origin: WO2019101907A1] The invention relates to pinned disc mills comprising discs with pins. The pinned disc mills are characterized in particular by being usable in particular even under high mechanical loads. For this purpose, the discs consist of a fine-grain ceramic or a metal/ceramic composite material with a high degree of strength, and the pins consist of a metal/ceramic composite material with a high degree of hardness.
