Abstract (en)  
[origin: WO2020016294A1] The invention relates to a centring device for a screwdriver having a screwdriver blade, for centring the screwdriver blade of the screwdriver on a screw to be turned, comprising a mounting body for mounting the centring device on the screwdriver, a centring sleeve for receiving the screw to be turned therein, and a bearing device having a restoring element, by means of which the centring sleeve is attached to the mounting body, wherein the centring device is formed such that if the centring device is mounted as intended on the screwdriver, the centring sleeve encloses the screwdriver blade of the screwdriver and can be displaced relative to the screwdriver blade in the direction of the mounting body, counter to the restoring force of the restoring element.
