Abstract (en)
[origin: WO2019097056A1] The invention relates to a hull device designed to be reversibly attached to an outer surface of a ferromagnetic structure of a marine or submarine system or vessel. The device comprises at least one attachment surface (20) suitable for attaching the device to the structure, and a plurality of permanent magnets (24) arranged in the vicinity of the attachment surface (20) in order to attach the device to the structure.
